A PLATFORM TO CONNECT
STUDENTS AND EMPLOYERS

Forum **TIME 4. HR**

Dear Colleagues,

Forum Time 4.HR brings together HR experts and interested companies for the systematic solution of employment problems. The topic of the Forum is HR platforms for connecting students and employers, as well as web applications for training. As a case study, the solutions and possibilities offered by the [StudENTER](#) platform will be discussed.

The forum is attended by managers of companies that have been offering young academics paid internship programs during or after graduation, where interns usually get all the rights and obligations as full-time employees, real work experience in, often, an international environment, as well as current knowledge and skills that they can immediately start using and applying. In most cases, it happens that within one to two years of establishing an internship contract, a permanent employment relationship is established in one of the company's sectors where an open position appears (usually colleagues with already acquired work experience in the company have an advantage over candidates "on the side").

We invite you to come to beautiful Montenegro and to take an active part in this event and contribute with your knowledge and experience to the importance of the topics discussed in the panels and workshops.

Entrepreneurs, institution representatives, academics and HR experts from Montenegro, Serbia, North Macedonia, Bosnia and Herzegovina, Slovenia and Croatia are expected to participate in this year's Forum.
